Gender Pay Gap Report

We are committed to maintaining a positive and inclusive working environment.

This includes ensuring that individuals have equal access to job and that staff are also paid equally for carrying out the same or equivalent roles.

Median Pay Gap

Men's hourly rate is 1.08% more than women's.

Mean Pay Gap

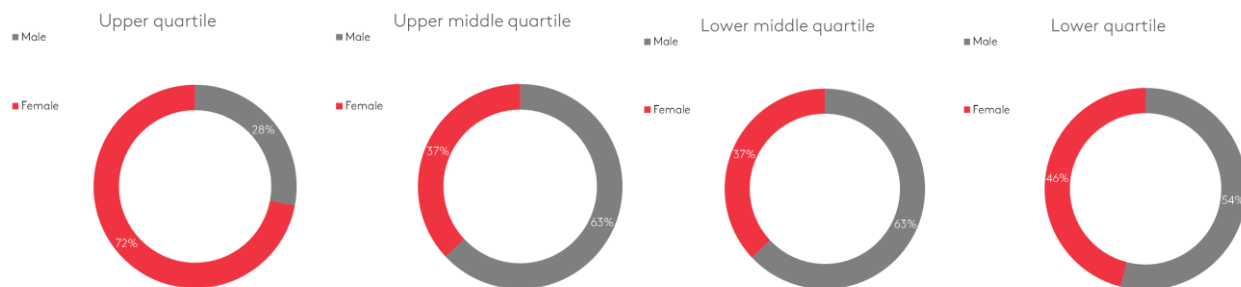

Men's hourly rate is 1.1% more than women's.

ENO strives to maintain a working environment where pay is broadly equivalent irrespective of gender. The balance between male and female remains largely the same across the wider organisation from the previous year.

The rates of pay remain broadly the same throughout the organization.

Our overall mean and median gender pay gap is based on hourly rates of pay as at 5 April 2019.

No bonus was paid in the year.

The above quartile graphs illustrate the gender distribution at ENO across four equally sized quartiles.

Through our recruitment, retention and development policies we seek to ensure equal access and opportunities to all our roles with a long term ambition to reduce the variation throughout our pay quartiles.

I confirm the data reported is accurate.
